EDUCATION

Florida International University

Jan 2020 — Dec 2023

Bachelor of Science in Computer Science

University Park, FL

- Cumulative GPA: 3.6/4.0 | Cum Laude
- Relevant Coursework: Advanced Unix Programming, Applied Parallel Computing, Artificial Intelligence, Computer Architecture, Data Structures, Net-centric Computing

WORK EXPERIENCE

IT Generalist II

May 2024 — Present

Florida International University

University Park, FL

- Implemented **Genetec Security Center** and its Omnicast, Synergis and AutoVu subsystems for traffic flow monitoring, parking permit enforcement, and perimeter security
- Managed endpoint devices using SCCM for **Active Directory** administration and Intune/Addigy for MDM
- Installed and maintained SharpV ALPR IP cameras across FIU, utilizing **Cisco VRF** routing to ensure network perimeter security in handling sensitive PII, totaling **114** cameras across three university campuses
- Orchestrated the configuration of **20+** Daktronics outdoor digital signage for displaying automated real-time alerts, wayfinding and parking occupancy to guide over **2,000** students per day
- Created a full-stack **web application** with modern JavaScript frameworks to manage parking information, campus activities, and geospatial data, implementing a REST API scaling to **50,000** users

IT Consultant

Jan 2018 — Mar 2024

Logic Pro, Corp.

Miami, FL

- Provided IT consulting and services for business across South Florida
- Configured and deployed a network of **20+** network CCTV cameras with accompanying web-based viewing software and mobile application, enabling secure remote monitoring
- Established secure **UniFi** SDN wireless access point system for full warehouse coverage of workstations and IP cameras

PROJECTS

Full-Stack Engineer, Panther Park (api.parking.fiu.edu)

Jan 2023 — Present

- Developed a full-stack web application using **SvelteKit**, **PostgreSQL** & **PostGIS** for storing campus events and parking data.
- Integrated geospatial queries via PostGIS to provide location-based event wayfinding and parking availability.
- Implemented an automated CI/CD pipeline using GitHub Actions for building Docker container images to deploy onto **Azure Kubernetes Service**.
- Delivered a digital-signage template and embeddable iframe widget for real-time parking information display on campus screens and webpage.
- Managed infrastructure as code with **Terraform** for AKS cluster provisioning and secret handling.
- Implemented monitoring with **Prometheus** and **Grafana** to track API health and container performance.

CERTIFICATIONS

Secure Infrastructure Specialist (A+, Network+, Security+), CompTIA (gtan.me/csis)

Feb 2025

CCNA, Cisco

Currently Pursuing

SKILLS

- **Microsoft 365:** Windows, Azure AD, Intune, SharePoint, Exchange, PowerShell
- **Network Administration:** Cisco, VLANs, 802.1x, ACLs, DNS, VPN, IP
- **Linux & Systems:** NixOS, Proxmox, PFSense, systemd, Bash
- **Cloud & DevOps:** AWS, Azure, Docker, GitHub Actions, Kubernetes
- **Programming:** JavaScript, Python, C/C++, HTML/CSS, Java, Flutter, Nix
- **Languages:** English, Mandarin, Cantonese
